

Multi-Office

Multi-office phone service is for those of you needing to connect offices in multiple locations. Whether you are a small business with people working from home, or a large organization with multiple branch offices scattered throughout the world, with Tierzero, your hosted PBX stays with us, so you can **easily plug in your phone wherever your office may be located, and simply connect to the rest of your company via 4-digit dialing.**

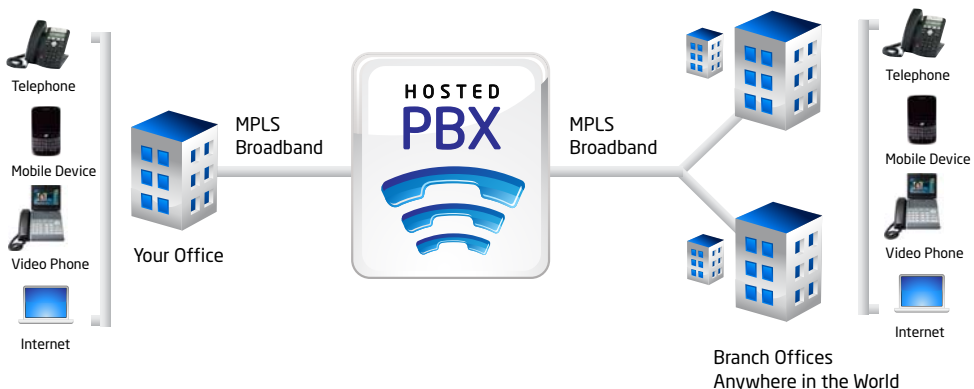

Home and Small Remote Office

For small offices with just a few people get a broadband connection from your local provider and plug your Hosted PBX phone and connect with your office via 4-digit dialing.

Branch Offices

For larger offices get a private connection to your home office anywhere in the world. Send and receive data via a private and secure MPLS connection and connect with your other offices via 4-digit dialing.
